February 12, 2023

After the Introduction to DevOps, Today on our second day we are discussing the very **basic linux commands** -

Ⓛⓘⓝⓤⓧ Ⓒⓞⓜⓜⓐⓝⓓⓢ

- ▪ **pwd**

pwd command can be used to determine the present working directory.

- **ls -a**

  Type this command to list files or directories including hidden files or directories. In Linux, anything that begins with a . is considered a hidden file.

- **cd**

  cd command can be used to change the current working directory.

- **ls *.py**

  Type this command to list all the files having .py extension.

- **ls -i**

  Type this command to list the files and directories with index numbers inodes

■ **ls -d */**

Type this command to list only directories.(we can also specify a pattern)

Top 50 Linux Commands you must know

1. is	1. clear	1. diff	1. kill and killall	1. apt, pacman, yum, rpm
